

International Guest Lecturer

Iñaki Hormaza

Professor, La Mayora Research Station (CSIC)

Malaga, Spain

Factors influencing avocado fruit set and yield

What can you learn? Iñaki's research is applicable to CA growers since it is important to know why certain flowers produce fruit and others abort. His research has examined the role of starch (energy) on fruit set and yield, pollen viability, pollen tube growth and ovule viability. He is also conducting research looking at pollinizers, new varieties and rootstocks.

Format: Lecture and Discussion – Plenty of time for Q & A.

When and Where:

Monday, January 13, 2014

9:00 a.m. – 12:00 p.m.

Fallbrook Public Utility District (FPUD)
990 E Mission Rd, Fallbrook, CA 92028

Tuesday, January 14, 2014

9:00 a.m. – 12:00 p.m.

University of California Cooperative Extension Office
669 County Square Dr., Suite 100, Ventura CA 93003

Pre-registration Required by Friday, January 10
